

*Renaissance*

# Renaissance

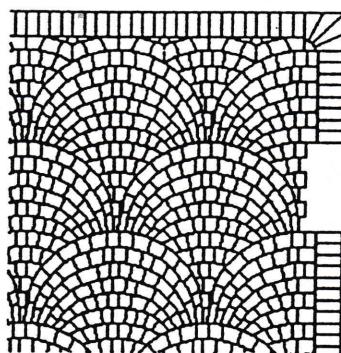

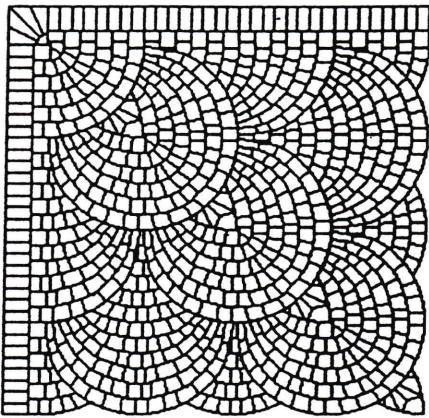

The hand laid cobble patterns in historic squares have always been greatly admired, but the cost of natural stone cobbles, and the skilled craftsmen to lay them, is beyond most people. Renaissance creates some of these decorative effects, easily, quickly and cheaply from a few units, for your individual patio, drive, garden path or garden feature.

Using the pattern book and laying guide, both the professional and the DIY man can lay these decorative patterns with speed and confidence.

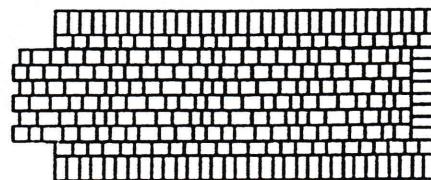

The units are self spacing - simply lay, brush over with sand, - the joints disappear, leaving a hand-crafted real stone look.

The pattern book is full of original ideas for beautiful paving - or if you prefer, you can design your own.

Straight edges next to walls and shaped edges next to flower beds or lawns.

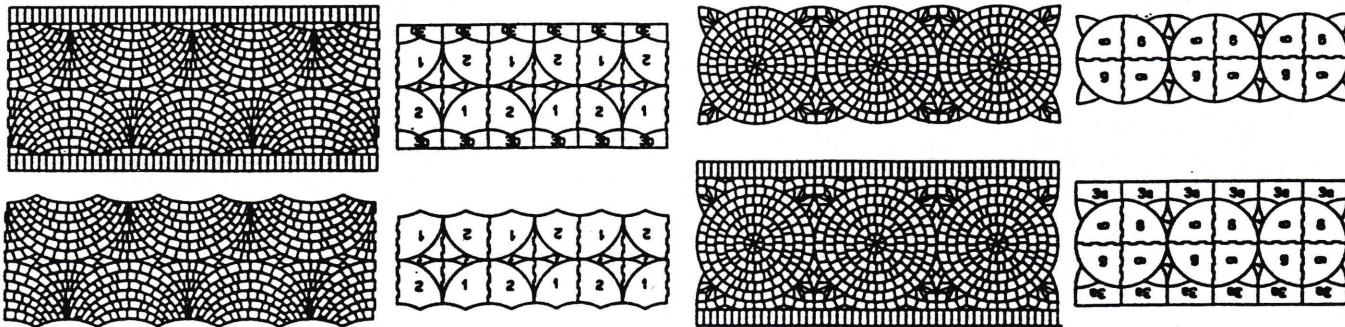

Straight paths can be linked to patio areas without a break in the pattern.

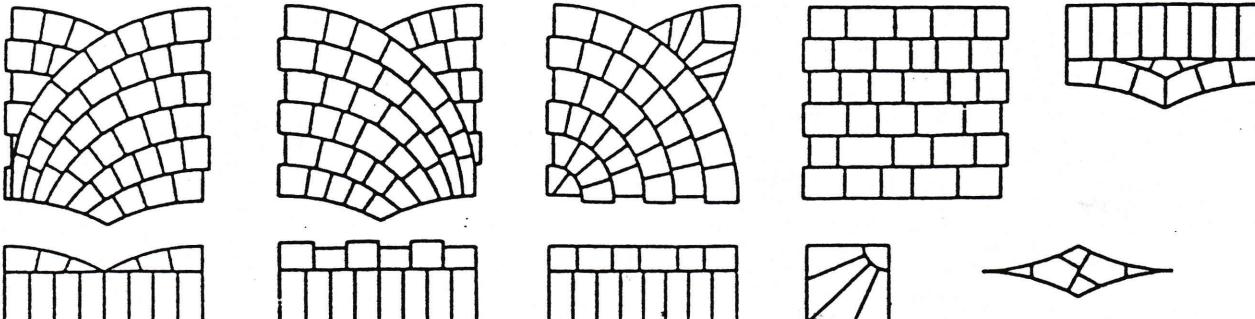

Edge units can be used as flower bed and lawn edging to speed up mowing and reduce weed invasion.

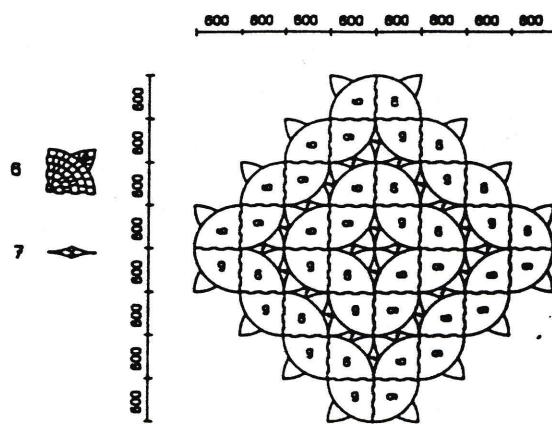

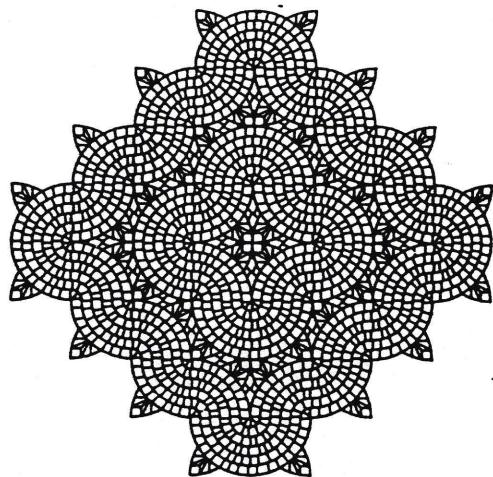

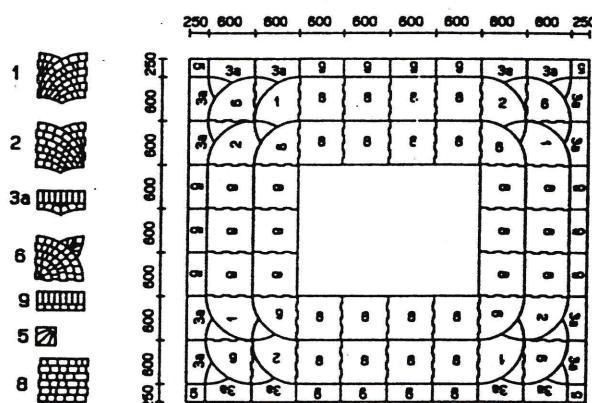

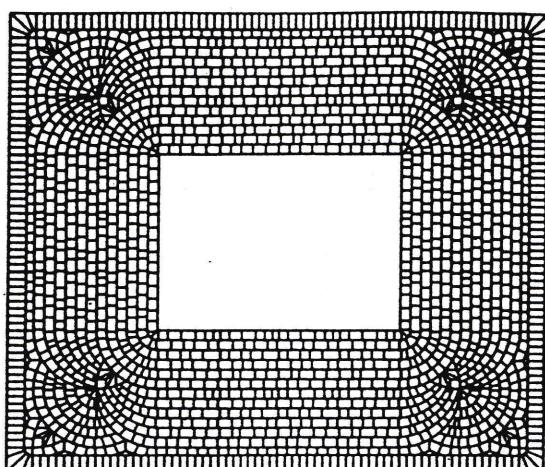

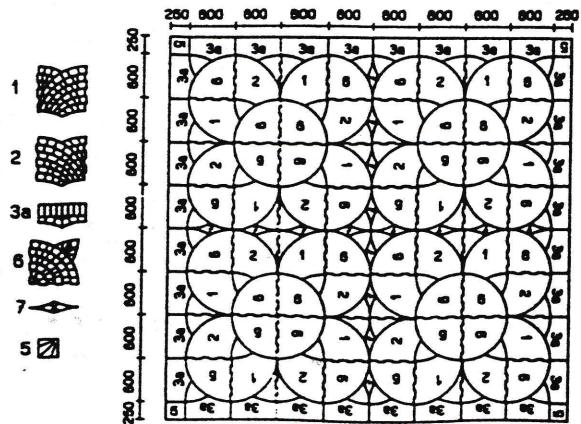

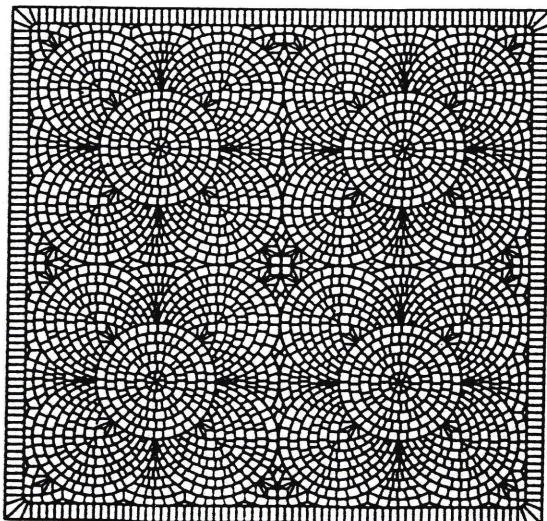

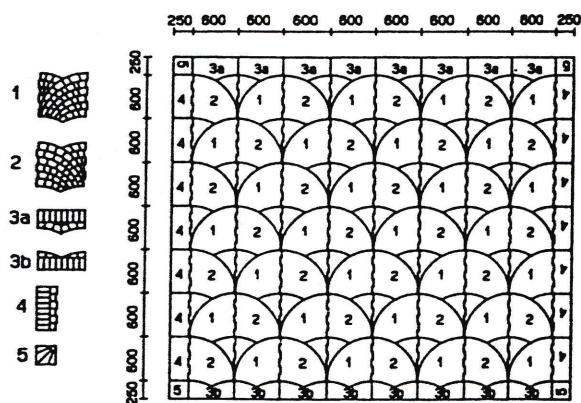

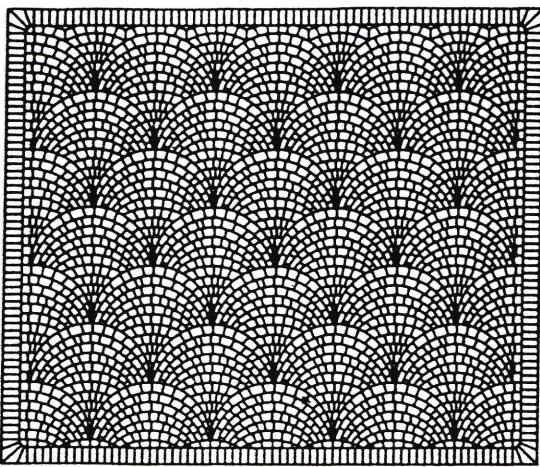

Garden paths have more character with Renaissance.

Main and edge paving units
